

The Carbon Chronicle

VOLUME 36: No. 5

ACME, ALBERTA. THURSDAY

FEBRUARY 28th, 1957

\$1.50 a Year; 5c a Copy

BALED GREENFEED FOR SALE — Greenfeed containing good Oats. Also some Brome and Alfalfa. Will take cash or grain.

—Carl Isaac, phone 3402 or 2604, Linden.

HOUSE FOR SALE—28x28 ft. two storey house, one bedroom on main floor, two bedrooms upstairs. Plumbing throughout. Remodelled kitchen with modern cupboard and double sink. Wired for both 220 and 110 volt power.

—For particulars phone 3358, Beiseker, Alta.

USE CLEAN STRONG SEED WHEAT IN 1957 — Registered Thatcher No. 1 and No. 2 seed. C.R.C. No. 31623 and C.S.C. No. 76-3559. Germination 96%. Sacked and Sealed. F.O.B. Plant 4 miles east of Acme. \$1.75 per bushel. Eligible for purchase on over delivery quotas.

—E. M. Brown and son, phone 303, Acme.

REGISTERED WHEAT FOR SALE—Thatcher Crop Certificate No. 34729. 568 bushels Registered No. 1 at \$1.75 bushel, and 670 bushels Registered No. 3 at \$1.60 bushel. Sacked and sealed. 630 bushels Thatcher Wheat cleaned in bin. \$1.45 per bushel. 800 bushels not cleaned in bin at \$1.28 per bushel. 444 bushels Registered Saunders No 2 wheat, certificate No. 34728. Sacked and sealed. \$1.70 per bushel. 1400 bushels Saunders Wheat uncleaned in bin at \$1.28 bushel. —Can be ordered at U.G.G. Elevator at Beiseker or Carbon or from F. A. Tetz, ph. 308, Carbon.

The Home and School Assoc. will hold its monthly meeting Thursday, March 7th at 8 p.m. Please plan to attend.

The Ladies Auxiliary No. 161 Canadian Legion will hold a Whist Drive Wed., March 20th in the Legion Hall. Admission 50¢ each. Lunch included.

Hospital patients this week are Fay Skakun in the Three Hills hospital, Mrs. George Abramenko in the Calgary General.

Shirley Schuler, we are pleased to announce, achieved 100 per cent Saturday in Grade II Theory in exams held recently by the Royal Conservatory of Music of Toronto in Drumheller. Congratulations, Shirley.

Flying Officer Howard Hunt is spending his 30 days leave at the home of his parents Mr. and Mrs. Harry Hunt. Howard is stationed with the R.C.A.F. at Winnipeg.

Mr. and Mrs. Leo Trepanier and Basil O'Rourke attended the K. of C. Banquet and charter night held at Drumheller on Thursday night, Feb. 21st.

Mr. and Mrs. Dave Pearson, Mr. and Mrs. Allan McKinnon attended the funeral of their father, Warren Spence at Delia on Wednesday afternoon.

We are glad to report Mrs. Ed Foster is home again after her long stay in hospital.

4-H NEWS

A meeting of the Carbon 4-H Club was held on Monday evening, February 18. During the business meeting a committee consisting of Wayne Ohlhauser, Wilson Redgwell, Geraldine Mortimer, Margaret Dechenne, Nova Buyer and Jerry Leiske was chosen for the Amateur Show which the 4-H is sponsoring in the near future. After returning from the separate meetings the lunch committee served a delicious lunch.

MONTHLY MEETING OF CARBON & DISTRICT CHAMBER OF COMMERCE

Monthly meeting of the Carbon and District Chamber of Commerce was held in the Scout Hall Thursday, Feb. 21st.

Despite the extreme cold a fair attendance was present. The business at hand was dealt with and several committee reports were heard.

Two committees were set up for obtaining a doctor and shoe-maker for the town.

A resolution was passed and sent to the Minister of Highways re Highway 21.

A special speaker Mr. Bruce Ramsay of Edmonton gave a very enlightening talk on the County System of Alberta. The

evening ended with coffee and doughnuts served by the entertainment committee.

See you at the next meeting which will be Thursday, March 21st, 1957.

The weather man has changed gum again and our brief warm spell is gone.

Civic Leaders

Each community has its leaders, men who devote their time and talents to public service. They spearhead the drives for better roads, parks and playgrounds, water systems and other local improvements. Lending their efforts and experience to the promotion of common interests, they are a necessary and important part of community life.

The desire to be of public service also motivates your utility company. It takes pride in the development of the community and its members take an active interest in civic affairs. They belong to local progressive organizations and contribute to community welfare.

NEW PRINTED PATTERN
EASIER—FASTER
MORE ACCURATE

4667
SIZES 2-10

PRINTED PATTERN

A printed Pattern that's doubly wonderful! Daughter will love a whirl-skirted jumper and blouse for school. Mother will love its new easy sewing—with directions printed on each pattern part.

Printed Pattern 4667: Children's Sizes 2, 4, 6, 8, 10. Size 6 jumper requires 2 1/2 yards 35-inch fabric; blouse takes 1 1/4 yards.

Directions printed on each tissue pattern part. Easy-to-use, accurate, assures perfect fit.

Send thirty-five cents (35c) in coins (stamps cannot be accepted) for this pattern. Write plainly: Size, Name, Address and Style Number and send orders to:

Anne Adams Pattern Dept.,
Department P.P.L.,

60 Front Street, W., Toronto
Be sure to write plainly your Name, Address, and Pattern Number.

SLEEP TO-NITE

SEDICIN tablets taken according to directions is a safe way to induce sleep or quiet the nerves when tense. \$1.00 All Drug Stores or Adrem Ltd., Toronto 5.

ITCH STOPPED IN A JIFFY

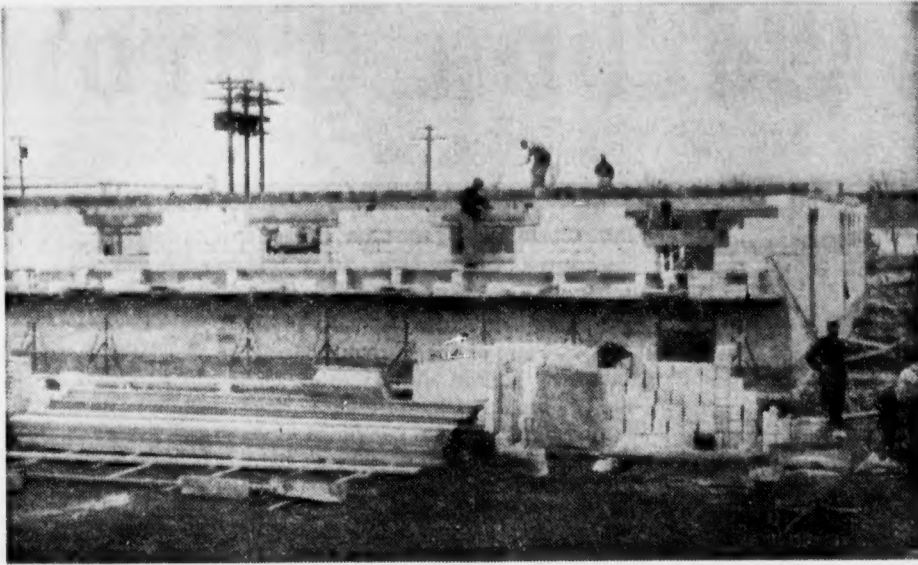

Very first use of soothing, cooling liquid D.D.D. Prescription positively relieves raw red itch—caused by eczema, rashes, scalp irritation, chafing—other itchy troubles. Greaseless, stainless, 39¢ trial bottle must satisfy or money back. Don't suffer. Ask your druggist for D.D.D. PRESCRIPTION.

BACKACHE May be Warning

Backache is often caused by lazy kidney action. When kidneys get out of order, excess acids and wastes remain in the system. Then backache, disturbed rest or that tired-out and heavy-headed feeling may soon follow. That's the time to take Dodd's Kidney Pills. Dodd's stimulate the kidneys to normal action. Then you feel better—sleep better—work better. Get Dodd's Kidney Pills now.

(The Progress, Winkler Man, Jan. 16/57)

THE BIGGEST contributor to Winkler's building boom in 1956 was the Co-op Creamery's Poultry Plant which was estimated at \$78,000. Shown here as it is being erected, the plant is now almost ready for operation. Of greater benefit than the building will be the market for the poultry raised by area farms and the resulting payroll from processing same.—Staff photo.

Trading stamps were outlawed 50 years ago

About half a century since the law forbidding the use of trading stamps was put on the Canadian statute books, these devices for attracting trade into retail stores are again causing controversy.

Apparently there are loop holes in the law large enough to let some trading-stamp schemes creep through and assume legal respectability. It is not contended that these schemes, if their legality is established by a court decision, differ materially in principle from the schemes that are illegal under the law as it stands. The schemes have been condemned officially by several retailers' associations and no one seems very happy about them except the companies who sell the trading stamps and supply the premiums.

Fifty years ago the public could understand clearly that, in the long run, the cost of trading-

stamp schemes would have to appear in the cost of goods they bought. There was little protest when the schemes were outlawed. It is not certain that the modern public can think so clearly. Conditioned by governments to believe that they can obtain something for nothing, they are as ready to approve of trading stamps as of welfare-state devices for sharing the wealth. If they believe that governments have sources of wealth other than the taxpayers' pockets, they are quite as likely to believe that retailers also can perform financial miracles.

It is generally true that one cannot get something for nothing, but the truth is subject to the qualification that every now and then, somebody does. Some persons are heirs of rich uncles, others make killings in the stock market or at the races, still others are among the few fortunate winners of sweepstake prizes. Governments are not openly in favor of these windfalls, but they manage to take their share of the winnings. At both winners and loser, being the race-tracks the taxes fall on based on the amount of money wagered.

The trading-stamp schemes may have been partly inspired by government fiscal philosophy. Obviously many customers of the retailers who hand out trading stamps will not go to the trouble of saving them for an eventual return. Unsold stamps show a clear profit to the companies, but if the stamps add to the cost of goods, all customers share in paying the costs.

In one respect, the trading stamp schemes are superior to government welfare schemes. Retailers and customers are not forced to use or save trading stamps. The taxpayer who does not want a government to look after his old age or his doctor's bills has no option about paying the cost of government sponsored pensions or health insurance plans. The Guide Advocate, Walford, Ont.

Monster tree at post office

The hydro crew's extension ladder was cranked up against the bristly side of the monster town Christmas tree Monday as strings of light were threaded through the branches. The 35 foot tree was brought to town Friday afternoon and now, shining with colored lights and topped by a star, it's the focal point of the shopping district.

Gay lights are also strung across Main and Mill Sts. to mark the holiday season.

Mansell Nellis donated the tree and a Chamber of Commerce committee, headed by Ted Tyler Jr., brought it to town. It was erected with the co-operation of the hydro-department. It is placed in sand and held in place by guy-wire.—The Free Press Acton, Ont., Dec. 13/56.

INFANT HAZARD

One of the greatest hazards to the safety of infants under the age of one year is smothering in their beds.

LIQUOR GETS THE BOOT

A brave Chicago company has a new plan for entertaining conventioners: No liquor.

And world-weary convention goers are finding phrases to praise it.

"It was time for someone to change the trend away from liquor." That was a typical comment at the American Hospital Association convention in Chicago.

The "someone" is Bauer & Black, Chicago producers of first aid and hospital supplies.

The company decided to do away with cocktail parties at conventions and trade association meetings.

Instead of liquor, Bauer & Black serves a late evening "ice box party," a buffet spread of cold cuts, cheese, bread and butter, coffee and milk.

"We just thought how people like to raid the ice-box and decided to give them a chance to do it at conventions," a company executive said.

He reports "enthusiastic reactions everywhere" to the new system and adds that "the milk goes over biggest." — Chicago Daily News.

TV'S AND RADIOS

Some 54 percent of Canadian households in 1956 had television receiving sets, 96 percent had radios, 74 percent had telephones, and 94 percent were served with electricity.

Fashions

Smart combination

7224

by Alice Brooks

Smart combination of simple embroidery and crochet! Together, they make a prize-winning chair set in lovely peacock design.

Favorite pineapple croch-t forms the plumage; colorful embroidery, the body. Pattern 7224: transfer, easy crochet directions.

To obtain this pattern send twenty-five cents in coins (stamps cannot be accepted) to:

Department P.P.L.,

60 Front Street, W., Toronto

Two free patterns—printed in our Alice Brooks Needlecraft book—stunning designs for yourself, for home—just for you, our readers! Dozens of other designs to order—all easy, fascinating handwork! Send 25 cents for your copy of this wonderful book right away!

Business slowed to minimum as deep freeze over area

An iron cold gripped Glengarry this week, and the mercury dropped to the second lowest temperature recorded in Alexandria—a frigid 37 degrees below zero, which was registered during the night of January 14-15. It was just one degree above the coldest weather ever recorded in Alexandria, on Dec. 29, 1933. —Glengarry News, Alexandria, Ont., Jan. 17/57.

Peanut Sweet!

Slice it thin, butter it generously and watch it disappear! Here's a tasty nutsweet bread that's easy to make when you use Fleischmann's Active Dry Yeast. If you bake at home, be sure to bake some soon!

Peanut Butter Bread

1. Scald 1 cup milk
2. Stir in 2 tablespoons granulated sugar, 2 1/2 teaspoons salt, 1/2 cup peanut butter

2. Meantime, measure into bowl 1 cup lukewarm water
3. Stir in 2 teaspoons granulated sugar

4. Sprinkle with contents of 2 envelopes Fleischmann's Active Dry Yeast
5. Let stand 10 minutes, THEN stir well.

6. Stir in lukewarm milk mixture and 2 cups once-sifted all-purpose flour and beat until smooth and elastic.

Work in additional 3 cups (about) once-sifted all-purpose flour

3. Turn out on lightly-floured board and knead until smooth and elastic. Place in greased bowl. Brush top with melted shortening. Cover. Let rise in a warm place, free from draft, until doubled in bulk—about 50 minutes.

4. Punch down dough. Halve the dough. Let rest 15 minutes, then shape each half into a loaf. Place in greased loaf pans (8 1/2 x 4 1/2 inches, top inside measure). Brush with melted shortening. Cover. Let rise until doubled in bulk—about 40 minutes. Bake in a hot oven, 400°, 30 to 35 minutes. Yield—2 loaves.

Needs no refrigeration

Child enjoys some variety in playthings

Variety in toys makes them more fun. A child enjoys playing with one toy for a while, then changing to another. The thing that is not so obvious is that a child likes to change his whole form of play, not just pick up another toy.

The youngster enjoys variety in playthings so that he can exercise his skill in various areas. He wants large wheel toys suitable for his age from the wooden trains to the two-wheel bike. These help the development of his large muscles. Then the smaller manipulative toys are a definite change, and this change is needed to develop the small muscles. Puzzles, blocks and beads are some of these toys that are fun for children.

A youngster also wants outlets for his dramatic play. If he is a cowboy, he wants to dress the part—complete with two guns. The fascination many little girls have for mother's old clothes for "dress-up" satisfies this urge for acting.

Creative toys

There is a need, too, for creative toys. Crayons or finger paints make a good beginning. As the child grows, his interest in other areas increases. Also he will like the chemistry sets, printing materials and building equipment which gives him the opportunity to make things.

Any youngster will want and enjoy some toys in each one of these areas. He will not want all his toys, even though different, to fall in the same category. He likes and needs this variety.

Fewer Sask. motor licences revoked 1956

There were 400 fewer motoring revocations, suspensions and demotions in 1956 than in 1955, J. A. Christie, chairman of the provincial highway traffic board, said.

Revocations, suspensions and demotions in 1956 totalled 1,794 as compared with 2,194 in 1955. Breakdown of the 1956 figure with the comparable 1955 figure in brackets is as follows:

Driving after drinking 952 (768), reckless or dangerous 59 (64), imprudent 215 (578) judgments 170 (220) Section 146-1 (failing to remain) 78 (122) Section 147-1 (failing to report) 49 (105), driving under suspension 30 (21), sections 90-91 V.A. 144 (136), others 97 (180).

A sharp drop in the number of red and blue licenses was also noted by the highway traffic board. In 1956 a total of 1,660 red licenses were issued compared with 2,097 in 1955 while the number of blue licenses issued dropped from 4,795 in 1955 to 1,134 in 1956.

Mr. Christie said the drop in the number of blue licenses was due to the amendment of the Vehicles Act in 1956 whereby a blue license was not issued for the first conviction with regard to several sections of the Act.

"This has also begun to affect the number of red licenses being issued. It will continue to affect the number of persons whose licenses are revoked, because instead of three minor offenses within two years they are now allowed four before revocation is effective," he said.

Directory Sask. members parliament and federal elections

A complete Directory of Members of Parliament and Federal Elections for the North-West Territories and Saskatchewan has been published by the Saskatchewan Archives board and is available to the public. The announcement was made by Dr. Lewis H. Thomas, Provincial Archivist.

"The purpose of this publication," Dr. Thomas stated, "is to provide a convenient and authoritative historical record of the names of persons who have been connected with public affairs in Saskatchewan (and the North-West Territories prior to 1905) as members of the Senate and House of Commons of Canada and as candidates in successive Dominion general elections."

NO ADDRESS

Someone in Ontario is wasting his generosity. For the last 10 years, a Christmas present to a person long missing from mailing lists in Medicine Hat, Alta., has been returned to the dead letter office in Ottawa. It contains no return address. The Free Press, Acton, Ont., Jan. 17/57. 3233

Spring Tonic for Canadian Women \$40 Million a year for Hats

A hat is all things to all women: morale booster, beauty-aid, creative outlet, head warmer—but to a group of young girls enrolled in the millinery school at Montreal's

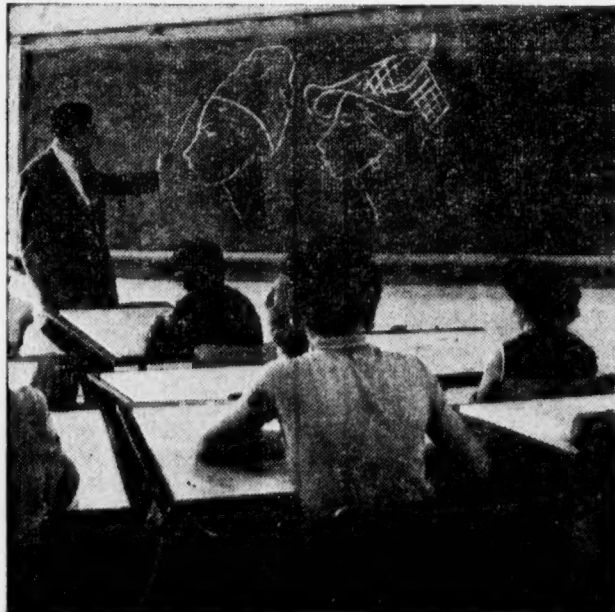

Ecole des Métiers Commerciaux it is something more besides: it is the badge of their profession, their future livelihood.

When it comes to hats, the sky's the limit. Mr. G. LeTestut, millinery school director, gives a course on the history of the hat. Above, he explains the phenomenon of the high-pointed "hennian" popular in the 15th cen-

tury when the Gothic spire began to pierce the skyline of Europe. Some historians have seen a direct relationship between architectural trends and m'lady's hat.

National Film Board of Canada Photos by Gar Lunney.

Classes in styling constitute an important part of the millinery course. Above, Mr. LeTestut illustrates the wrong hat (left) and the right hat (right) for an angular face.

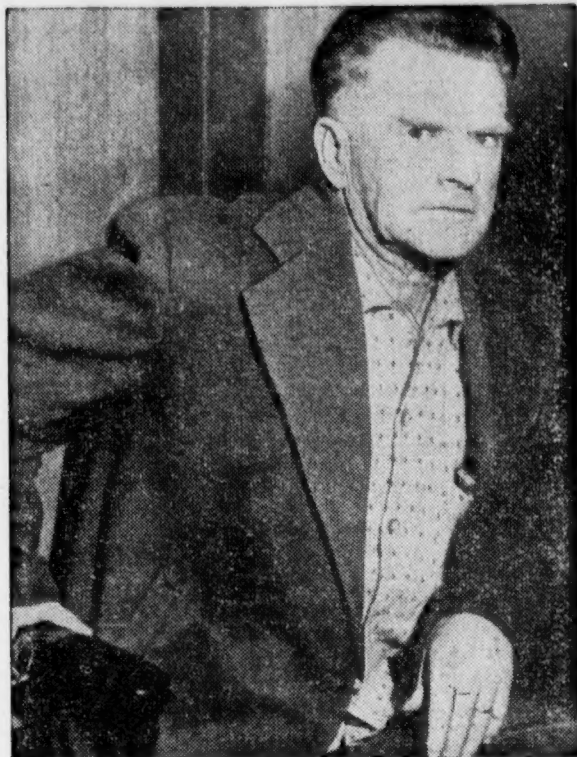

In 1956 Canadian women spent \$40 million on headgear. To most of them the purchase represented more than an investment in fashion: a new hat provides the emotional lift of a spring tonic.

World Happenings In Pictures

INFORMAL DISCUSSION—Duncan Sandys, right, U.K. Defence Minister, listens to Secretary of Defence Charles Wilson, at the Pentagon, during an informal discussion. Sandys is in the U.S. for a series of talks which include the U.S. guided missile program.

SLAYER'S FREEDOM ENDS—John Henry Adams, 64, is shown in jail at Colorado Springs, where he admitted that he is Noverta Randolph Clayton, and that he escaped from a Mississippi penitentiary where he was serving a life sentence for murder of his wife. He had built a new life and family in Colorado since then.

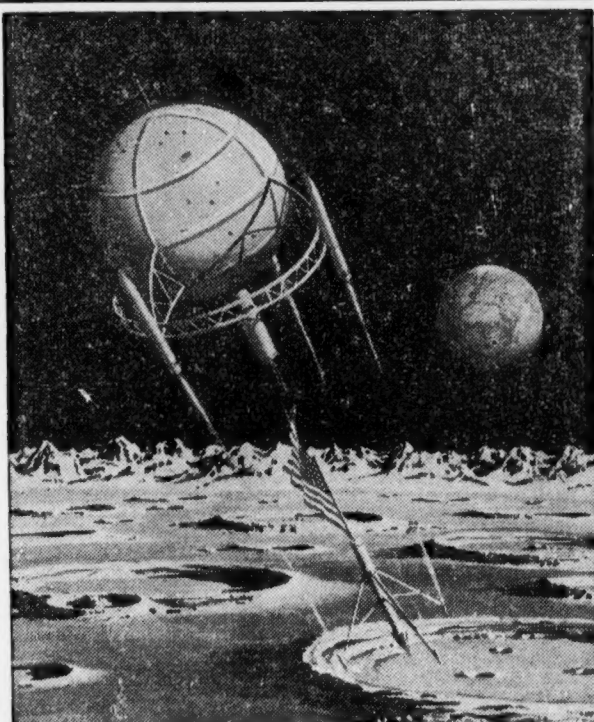

YOUR RED CROSS IN ACTION

Dolores is a young patient, one of many in the Junior Red Cross Hospital, Regina. She is receiving treatment to correct a curvature of the spine caused by a fall from a horse some years ago. The complete body cast keeps her confined to a bed, but with the aid of a mirror, Dolores can see almost everything that goes on and enjoys watching TV. Since this photo was taken, she has had a spinal fusion operation and is now home and able to walk with the aid of a smaller cast. Further treatment will be carried out later on. Since 1928, when Red Cross inaugurated crippled children's work in this province, over 6,000 young patients have been helped to partial or complete recovery. This is only one of the numerous services carried on by your Red Cross to give hope and aid to those who cannot help themselves.

FIRST IN THE NATION—The first commercial-sized, breeder-reactor atomic power plant is gradually shaping up in Monroe, Mich. Shown is the foundation for the atomic reactor building, the dome-shaped unit which will provide the energy for the Enrico Fermi plant. Located at the bottom of a 56-foot excavation, the foundation itself is 20 feet deep and 87 feet across. The breeding process, scientists say, will extend the supply of atomic fuel to out last the reserves of fossil fuels more than 50 times.

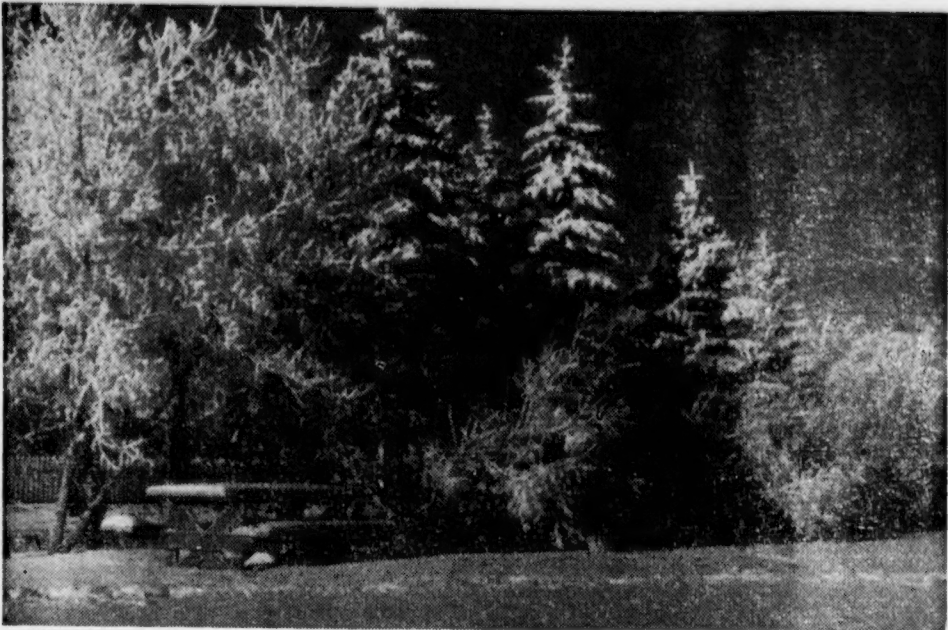

IT'S UP FOR GRABS—When you and your girl are staring at that romantic moon some night, look carefully; somebody may be establishing a beachhead up there. This sketch by artist Ken Fagg shows the American flag being planted on the lunar landscape from a space ship. Proponents advocate this move before the Russians can claim the moon with radio-controlled rockets. They say the U.S. has a prior claim by virtue of radar contact with the moon in 1946. Sketch is from Mechanix Illustrated magazine.

REVOLUTIONARY DWARF "DRIVE"—Putting their act into high gear at Paris Grand-Cirque 57 are English midget clowns Chapman and Harty. They may be cueing their audience on how to conserve France's precious supply of gasoline.

(Humboldt Journal, Humboldt, Sask.—Jan. 10/57)

WINTER IN THE PARK—Winter or summer, the Lions Club Park is a beautiful spot but the heavy coating of hoarfrost on the trees and shrubbery at Christmas made it an exceptional picture of beauty. The picnic table stands unused but a path through the snow shows children still find it a wonderful place to play. The Lions Club plans further development in the park next summer. —by Michael Photography

The Sports Clinic

(An official department of the Canadian Amateur Sport and Physical Fitness Development Service)
By Lloyd Percival

Beating the "away from home jinx"

Many sports psychologists, notably Coleman Griffith, have spent a lot of time studying the problem of athletes who play well on their home grounds, but are below par away from home.

It's generally agreed that much depends on the individual's general make-up; some people, because of their nervous and emotional temperament, find it difficult to adjust to new and different circumstances.

This is apparent not only in sports, but in social life as well. Some people are completely at ease when they go to a party and meet new people; others find it hard to "be themselves."

In the case of athletes away from home, they become conscious of the same sort of thing, plus the fact that they often feel the spectators are antagonistic. This creates a feeling of strangeness, affecting their ability to play as efficiently as usual. It doesn't take much to upset the fine edge of skill and co-ordination.

The fundamental reaction that

Raps businessman's attitude to farmer

Manitoba business and industrial leaders were criticized in Ottawa by Manitoba's minister of agriculture, Hon. C. L. Shuttleworth, says a recent issue of the Manitoba Farmers' Union's house organ The Voice of the Farmer.

Making his first appearance as minister of agriculture before the federal-provincial agricultural conference in Ottawa recently, the minister criticized urban leaders for adopting the attitude that there was nothing wrong with the farmer financially, and that the farmer was just a grouser.

He expressed amazement that in industry and labor, and among business generally, there is not enough awareness of what is happening to agriculture. He said that, in his travels through Manitoba he found the attitude prevailing among Winnipeg business leaders to be held also in other large urban centres.

While prices that the farmer received for his products appeared to be settling down to a stable position, the farmer's costs of production were rising. The farmer thus found himself trapped in a price squeeze.

Mr. Shuttleworth deplored the attitude which he said was common in many urban areas that the farmer had had his day and is now well off. It is not possible to have a strong and buoyant industrial economy and a lagging agricultural economy. The two economies must go hand in hand, the minister maintained.

ORIGINATED IN EUROPE

Brussels sprouts are a descendant of wild cabbages brought from warm Mediterranean lands. The sprout ranks as one of the few vegetables to originate in northern Europe.

You serve by giving when you give to the Canadian Red Cross.

A waste of time

While sitting with the famous General Ulysses Grant at the camp-fire late one night, after everyone else had gone to bed, a friend said to him, "General, it seems singular that you have gone through all the trouble of army service and frontier life and have never been provoked into swearing. I have never heard you utter an oath nor use an imprecation."

"Well, somehow or other, I never learned to swear," he said. "When a boy I seemed to have an aversion to it, and when I became a man I saw the folly of it. I have always noticed, too, that swearing helps to arouse a man's anger; and when a man flies into a passion, his adversary who keeps cool always gets the better of him."

"In fact, I never could see the use of swearing. I think it is the case with many people who swear excessively that it is a mere habit, and that they do not mean to be profane, but, to say the least, it is a great waste of time."

More than 161,000 Canadians of all ages participated in the Canadian Red Cross Water Safety program last year.

COURTESY PAYS OFF

FIRST HALF ALL-STAR TEAM

Three players were unanimous selections for the National Hockey League All-Star Team as picked for the first half of the current season. The three players who received every vote possible for their respective positions were Doug Harvey of Canadiens on defense, Jean Beliveau of Canadiens at center and Detroit's Gordie Howe at right wing.

Other members of the National Hockey League's super six were Terry Sawchuk of Boston in goal, Red Kelly of Detroit on defense and Ted Lindsay of Detroit at left wing. The first half voting was carried out by a panel of hockey writers, broadcasters and telecasters from the six N.H.L. cities.

Scouts store paper till sale promised

With the unexpected refusal of the usual Guelph dealer to accept scrap paper from the regular paper collection here, scouts and cubs were faced with a problem last Saturday. Since they would have to store the paper until it could be sold, they decided to pick up only bundles that had been placed outside as requested.

A crew remained at the scout hall to tie papers which had been placed outside loose while the scouts and cubs toured the town with trucks borrowed from Thompson's Garage and the Acton Free Press.—The Free Press, Acton, Ont., Dec. 13/56.

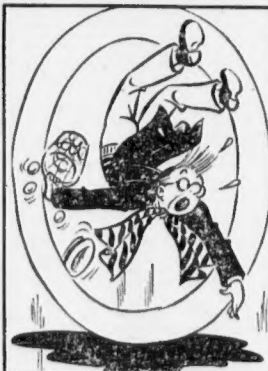

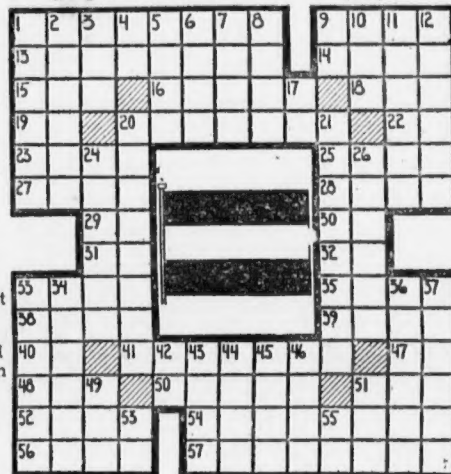

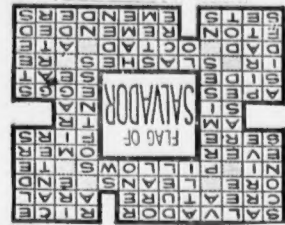

Highest mountain in Britain is Ben Nevis in Scotland.

Here's the Answer

RIVETS

By George Sixta

FOR GREATER SAFETY—This bulky air-filled cushion may become standard equipment on airliners soon. Its designer, pioneer aviator Assen Jordanoff, of Mineola, N.Y., shows how the inflated pneumatic device, in an L-shape, would protect passengers from injury due to crashes or forced landings. The French poodle represents a child in his lap. Slated for production in the next few months, the individual cushions can be inflated by the pilot in three seconds.

On The Side : • By • E. V. Durling

A hair-do can do much for a woman's appearance. But what does the average haircut do for a man. Not much. However, when handled by specialists it can make the average man a better looking fellow. The artistic haircutter, whose price is very little more than that of the ordinary tonsorialist, studies a man's features. The size of the ears, the shape of the nose and the forehead are all considered. Also the receding hair situation when such is present.

Stopping "stenographer's spread"

Does your secretary suffer from that affliction known as "stenographer's spread"? If so, what is she doing about it? One of the best ways for a woman to do away with spreading hips and to decrease her waist-line is to take up bowling. Participation in that sport can really streamline a too generously proportioned female.

Scintillating sidelights

The most important player on a baseball club is the catcher. That's what I continue to claim. And forever will. It has been truly said that pitching is 70 percent of a ball club but a good catcher is 70 percent of the pitching. Sarah Bernhardt once observed, "Three-tenths of good appearance in a woman is due to nature; seven-tenths to dress" . . . According to beauty shop operators, who certainly should know, it is usually blue-eyed brunettes who switch to blonde hair. They think their blue eyes will make them outstanding blondes. Radishes are good for the complexion. That's what a New Yorker claims. Says he knew a Polish countess who, at the age of 68, still had her schoolgirl complexion. This countess ate six radishes before every meal including breakfast. She said the women of her family had been doing that for 300 years and were celebrated throughout Europe for their beautiful complexions. That gambling machine known as "the one arm bandit" was invented in 1903 by a San Franciscan named Klumpke. Was never patented. The U.S. government would not issue a patent for the machine on the grounds that it "served no useful purpose."

Oysters best in May

As for that oft-repeated claim that oysters are good only in the "R" months. There's nothing to it. Oysters are good all the year round and are at their best in May.

Different in Holland

Women in the Netherlands do not become of age until they are 30. Until the Dutch girls are that age they cannot marry without the consent of their parents . . . The war between Russia and Japan in 1905 was the first war between the white race and any other race that the white race lost . . . If a woman has large eyes she loves luxury and is not happy without it. If she has small eyes she is inclined to be morose and selfish. Or, so claim the character analysts . . . Here is an easy question many people have to ponder before answering. See how quickly you can answer it. What two consecutive months each have 31 days.

Best to have young mother

How old was your mother when you were born? Gynecologists have claimed the best years for a woman to have children is when she is between 18 and 23 years of age. Children born of mothers in that age group are said to develop into the healthiest and most intelligent adults. That let's me out. My mother was 31 when I was born.

SELKIRK DOES WELL IN P.E.I.

Selkirk wheat has performed well in yield trials at Charlottetown, P.E.I., over the past three years. In comparison with Acadia, the variety most commonly grown on the Island, average yields per acre have been 32.7 bushels for Selkirk and 30.7 bushels for Acadia. Considering the superior rust resistance of Selkirk, its better milling quality, and the preference of most growers for bald wheat, there is a probability that Selkirk will displace Acadia in P.E.I.

(Empire-Advance, Virden, Man.—Jan. 9/57)

Root diseases of oats

Various seedling, stem and root diseases afflict the oat crop. One of these, a root disease usually referred to as common rootrot, is caused by the fungus, *Fusarium culmorum*, or related species, states P. M. Simmonds, Officer-in-Charge, Canada Department of Agriculture, Plant Pathology Laboratory, Saskatoon.

Common rootrot in oats was once a rather serious disease but the newer varieties appear to have considerable resistance. No doubt this resistance was obtained by the plant breeder through the stringent selection of the best lines during trials for yields. Past experience in disease control, however, has shown that new, more virulent forms of the fungus causing the disease may appear, and so it is important for the grower to be able to recognize common rootrot so that control measures can be taken promptly.

The common rootrot fungi not only attack the roots but any part of the oat plant. They live in the soil or on the seed. Consequently seed and seedling blights may occur from seed that has become contaminated. In such cases the grower will note poor, uneven emergence of the crop in the spring and many blighted seedlings. In later stages of plant growth, infections from fungi living in the soil or on contaminated seed usually invade the crown or adjacent plant tissues. Once a plant is infected the disease area persists indefinitely. Whether it enlarges rapidly causing serious injury to the plant depends on weather conditions.

There appears to be severe injury following periods of warm weather and a shortage of moisture in the soil. Alternate spells of dry weather and heavy rainfall as the crop starts maturing increases common rootrot damage. The injury may show as bleached dead tillers on many plants, but careful examination of the crowns for signs of rot is necessary for complete identification of the disease. In slight and moderate cases the extent of injury cannot be determined readily until yields are available at harvest time.

Occasionally plants will be killed by a severe invasion of the crown. They die early and are easily seen scattered here and there through the still green crop.

Complete control of this disease is almost impossible because these fungi may be carried on the seed and are commonly found in most soils. If seed treatment is necessary, and this can only be determined after careful examination by a pathologist, any of the fungicides used for smut control should be satisfactory. Rotation of cereal crops with non-cereal crops where practicable may help, together with good cropping methods for the district concerned, and the maintenance of soil fertility.

Laff for today

After 40 years in the country a couple sold their farm and bought a house in the city where they could enjoy the comforts of life. On the first morning the wife arose before sunrise and said, "Isn't it about time you were getting up and lighting the fire?"

"Nope," yawned the old man. "I'll call the fire department. We might as well get used to these city conveniences right now." The Sun, Grenfell, Sask., Jan. 23.

YOUR RED CROSS IN ACTION

One of the 1,122 individuals who, during 1956, turned to their Red Cross for assistance is seen borrowing a wheelchair from one of the 24 Sickroom Loan supply Cupboards operated in the main centres of Saskatchewan. Some 1,300 items from air cushions to Hospital beds were loaned for periods up to three months. Sickness or disability is always costly and at such times, Red Cross stands ready to help with this free service. One of the many ways the Society goes about its work of mercy.

And the Nokomis band played on . . . into 1957

On New Year's night the Nokomis Theatre was packed to the doors to hear and enjoy an excellent concert of band music, which was rendered by the two bands under the splendid leadership of

Mr. Ted Klassen. The Senior Band played for the first hour. Mr. Jack Klassen for producing such fine artists in wind instruments. One must mention one of the young players who had full command of his slide trombone, in the person of Duane Marvin, whose solo work was excellent. The Junior Band thrilled the audience with their rendition of a good old Scottish air, "Auld Lang Syne." This number brought cheers and cheers. The Chairman told the audience that this group of very young players, most of them not in their teens and some just able to read since school started, would be pleased to play their number over again. All joined in singing the song. —The Watrous -Manitou, Watrous, Sask., Jan. 10/57.

What is your major appliance question

Question—I do not get as high a grade from my cream when it is cooled in the refrigerator as I do when it is cooled in the well. What is wrong with my refrigerator?

Answer—Nothing. Dairy science tells us that air is a very poor medium for cooling milk or cream. Water will remove heat much faster and temperature of cream should be reduced to 50 degrees within one hour of milking. The cooling of cream in a freezer or refrigerator is not recommended for the following reasons:

(a) Air cooling, being slow, allows considerable bacterial growth before cream in the centre of the container is cooled.

(b) If left uncovered in a closed refrigerator, cream may pick up food odors and cause excessive frosting of the refrigerator.

(c) If cream is covered while cooling, food or animal odors are not allowed to escape; this gives an off-flavor result.

These are the reasons that you might get a better grade for cream cooled in a well rather than in a refrigerator. However, the refrigerator is acceptable for storage purposes after fast cooling if the cream is left covered.

The Canadian Red Cross Society will celebrate its 50th anniversary in 1959.

Will canvass Eramosa for disease control

A directors' meeting of the Eramosa Township Federation of Agriculture met in No. 10 school to discuss calfhood vaccination for the township.

As it stands now, each farmer in Eramosa who vaccinates his female calves, pays \$1.00 for this immunization. If the township were a supervised area, all calves would be vaccinated free of charge to the owner other than through tax channels. This points up the fact that cattle owners who are paying for their own vaccination are also helping (through tax assessment) to pay for the supervised areas.

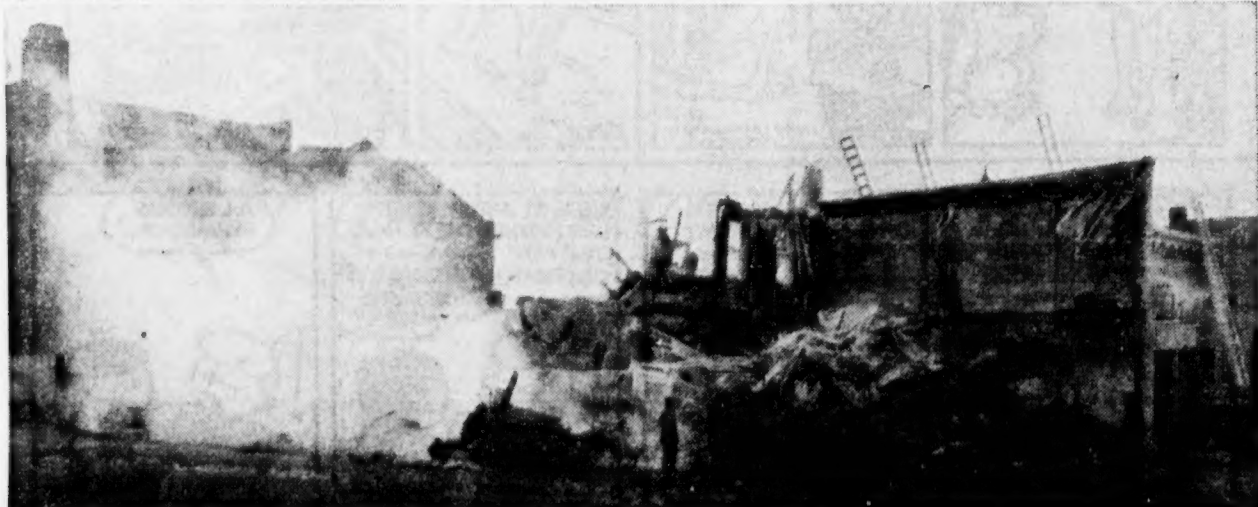

To make vaccination effective in the township, two-thirds of the cattle owners must sign a petition requesting the service. To promote full understanding of the plan, a meeting will be held for farmers in the Rockwood town hall early in January.

Following this meeting, a canvass will be made of the township. A program similar to this was done for TB.—The Free Press, Acton, Ont. Dec. 13/56.

Britain recommissions plane carrier Ark Royal

The British aircraft carrier Ark Royal (36,800 tons), described as the Royal Navy's most powerful weapon, was recommissioned November 1. Her recommissioning was decided on before the outbreak of the present Middle East crisis, officials said.

The hospitalized veteran is not forgotten by the Canadian Red Cross. Their lives are a lot happier through your support of the Canadian Red Cross. 3233

A HEAP of smouldering rubble is all that is left of the Balmoral disastrous New Year's Eve fire. Saul Reidder, owner and proprietor hotel, one of Virden's oldest landmarks, after it was demolished by of the Balmoral, hopes to be able to rebuild soon.

EDITORIALS

from other weekly papers

(These are not necessarily the views of the editor of this paper)

Courage of
their own convictions

(From The Rodney Mercury—November 22, 1956)

Not too long after last week's issue was off the press a rather irate person phoned to ask what kind of a "sheet" we are running when we did not keep subscribers informed of what is going on in the community. We have a stock answer for such questions—that we cannot run a business and be on the prowl all the time for news and because of this have to rely on people to give us some of the news. On delving deep into his "beel" we found he had a definite "axe to grind" and was irked at a municipal body for taking away a slice of business he thought should belong to him. We invited him to write a letter to the editor for the next issue, affixing a pen name for use in the paper and his own name which we would never divulge.

To this, his answer was the same as all others—"I won't write a letter. You're the one to do it." That is all very well to say it is the editor's job to write editorials to champion someone's cause, but when a fellow will not come to his own assistance, then he just does not have the courage of his own convictions or a leg to stand on. Every few weeks the editor is given the "opportunity" of rising to some cause on someone else's behalf. Actually, they want nothing more than for the editor to stick his neck out. If he gets it cut off it is no injury to them and this is the very thing this fellow wanted us to do in this week's paper.

It just so happened that writing an editorial and exposing this very body in the way he wished would have been contrary to the editor's own views. A year and a half ago we were confronted by a subscriber who wished an editorial written which could have been responsible for making some business for him. But because he had a selfish motive we wrote an editorial giving the converse of what he asked. We haven't seen him since, but he still remains on the subscription list.

All of which boils right down to the fact, if anyone wishes to bring some matter before readers of this paper they can do so by writing to the editor and signing their own name. A pen name may be used, but the writer's name in his own hand writing must also be affixed. His name will remain a secret if he wishes. Any other letters, whether of a controversial nature or not, without a signature, will be thrown in the waste basket. Above all, please don't ask the editor to stick his neck out to grind your axe.

★ ★ ★
Crime prevention

(The Torchwood Times, Punnichy, Sask.—January 17, 1957)

"Crime In Your Community" is the title of a booklet handed us recently by a member of the local Royal Canadian Mounted Police. A sub-heading reads "Beware Of Bad Cheques!" The booklet comments that each year Canadian business loses an estimated two million dollars by means of forged cheques, raised cheques and money orders much of which could be saved if employer or employee exercised a few precautions.

About 85 percent of fraudulent cheques are cashed in stores and other places of business. Banks, because of their precautions, are well down on the swindler's list of victims.

In 1955 the Fraudulent Cheque Section of the RCMP received advice of a total \$450,000.00 of forged negotiable paper and it is estimated that only 25 percent of such forgeries are reported to the Section says the book.

The law is adequate to punish the offence of forgery and uttering but it is better to prevent crimes than to punish them.

The most effective method for the prevention of crime is education and the object of this booklet is to enlist your aid to reduce crime by prevention.

Contact the local detachment and obtain one of these booklets containing helpful hints on counterfeit money, how to recognize the professional swindler and a number of safeguards. Have your staff study this booklet.

Too much handling

(From The Red River Valley Echo, Altona, Man.—January 17, 1957)

In a recent news release on expenditures on government employees, the following table was added to illustrate a point. The point in question might well be examined in regard to industrial expenses when the cost accountant comes around with his report.

Long, long ago the council of state was being held at a very long table, down which sat many ministers. At one end sat the king and at the other the minister of finance was endeavouring to justify his departmental spending.

The minister drew towards him the pitcher of ice water and drew out a big piece of ice, holding it up for the king and all his fellow ministers to see. They perceived that it was a very big piece of ice indeed.

Then the minister asked the one seated next to him to pass the ice down to where the king sat. It was a slow process, as there were many ministers and by the time it reached the king's end of the table it had become quite a small piece.

"Now do you understand, your majesty," said the finance minister, "how much smaller that piece of ice has become with so much handling?"

(The News, Indian Head—Nov. 1/56)

'OLD LADY'S' FACE LIFTED—This is the start of a "before and after" transformation which in recent weeks has affected The News office facing. As it has happened only once in the last 60 years, perhaps it should be reported. At any rate, here is the Old Lady of Dewdney Avenue as she was before the face-lifting, a dignified old dowager built in an age when frills had their place. Now that she is gone, it seems that she didn't really look so bad, and many indeed have appeared somewhat distinguished in a moth-eaten sort of way.

Gaze also on this, as the saying is, for here is the new 1957 model with sweepflight styling, or whatever, complete with new stucco front. The lettering is in black, but Indian Joe is a multi-colored creature and lends a touch of surprise to the general layout. Quite a change after 50 years, or more. A panel of glass brick gives a bit more of modernity. Only the exterior front of the building has been touched; the inmates remain the same.

Of cranes and men

At latest count there are 27 wild whooping cranes now in existence (plus three in zoos). That is one less than a year. And American and Canadian officials have been conferring on means to save these huge birds from extinction.

Why should they be, The adult whoopers are five feet tall and spread their wings almost eight feet—too small for an ostrich and too big for a coot. They toil not, neither do they spin—at least, not for men. They are not good to eat; they lay only a couple of eggs a year. If they dispose of any insects and grubs harmful to agriculture, the birds are now to few to be of any help. And as for their

far-ranging voices—who could not whoop with a five-foot windpipe? But they are magnificent birds—stately symbols of the days before the march of "civilization" wiped out the passenger pigeon and almost obliterated the bison. It is not a necessary or a superior attribute of Homo sapiens that he destroy the beautiful and the grand in his path.

Should the whooping crane vanish because of men's wantonness or for want of their protection, then will vanish also a fraction of those values which give dignity to human society and bind it together.

—Christian Science Monitor.

Brief comment

(Free Press, Acton, Ont. Dec. '56)

There is a start being made now to line up municipalities into a longer period of daylight saving time. Inquiry body seems to be the Railway Association. Let's all get together and see what it's like any morning at seven o'clock at this time of year.

The bright Christmas greetings have been rolling in these days. If ours are delayed don't put the blame all on the postal service. They told us to do it early.

A well dressed window depicting the Christmas scene can do much to attract attention at this season of the year and incidentally can induce business... Christmas is that time of year when the feeling of good will should permeate in all directions.—Huntingdon (Que.) Gleaner.

Actually it doesn't take too much effort to make a newcomer at home in a community. A friendly smile as you pass on the street, or a pause to say "hello" with words of welcome. —Davidson (Sask.) Leader.

A newspaper editor, with some space to fill, set up the Ten Commandments and ran them without editorial comment. The next day he got a letter from a subscriber which said: "Cancel my subscription; you're getting too personal." —Montreal Star.

Some methods of farm marketing are better than others, but, even with the best system yet devised by man, the price, in the long run, is determined by the age-old law of supply and demand. —The Farmer's Advocate.

The main thing is to ensure that the sidewalks are to the greatest possible extent kept clear of snow... It is better that some careless or thoughtless citizen should be fined than that some person should suffer serious and possibly permanent injury. —Trenton (Ont.) Courier-Advocate.

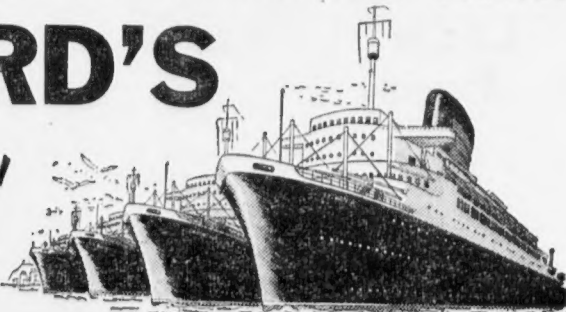

Canadian Red Cross Outpost Hospitals and Nursing Stations provide medical care and treatment to residents of our remote areas.

Swalwell

By Mrs. H. Lammle

The Swalwell Men's Curling Club held their bonspiel on Feb. 18-23. The weather man was very obliging, keeping the ice well frozen. The Club wishes to thank all those who took part in making it a very successful 'Spiel, also to thank the ladies and all those who donated for all the good meals and lunches served.

Following were the prize winners in the four competitions:

FIRST EVENT

1. H. Lammle, Swalwell.
2. Bob Empey, Swalwell.
3. Jock Reid, Carbon.
4. Fred Empey, Swalwell.

SECOND EVENT

1. Bob Empey, Swalwell.
2. Wilfred Boese, Swalwell.
3. Gibson, Carbon.
4. Fred Empey, Swalwell.

THIRD EVENT

1. Bill Waldron, Swalwell.
2. John Empey, Swalwell.
3. Buck Howe, Three Hills.
4. Donald Boese, Swalwell.

FOURTH EVENT

1. Bill Webb, Three Hills.

2. Bill Waldron, Swalwell.
 3. Lou Frere, Trochu.
 4. Gordon King, Three Hills.
- Grand Aggregate was won by Bob Empey's Swalwell rink.

Mr. and Mrs. Lonnie Tricker of Dawson Creek visited family and friends in the Swalwell district.

Mr. Robert Tricker Sr. of Rimbey is visiting family and friends.

Mr. and Mrs. Pat Bertram of Barrie, Ont. (nee Rosalind Tricker) are visiting relatives and friends.

Home and School will be on Sat., March 2nd in the school auditorium at 8 p.m. Mr. George Fyten will show films of his trip via Hart Highway and other interesting parts of the north.

Mr. John Wulff celebrated his 83rd birthday on Feb. 26. Congratulations.

BEISEKER DOINGS

BOB KNIGHT RINK WINS GRAND AGGREGATE AT BEISEKER BONSPIEL

After one week of very competitive curling, the annual Beiseker Men's Bonspiel came to a close on Saturday, Feb. 23rd at 10 p.m. Rinks from neighboring towns, including five Calgary rinks and locals made up the 32 rink entry. Despite the severe cold spell, draws were run close to schedule. Grand Aggregate honors were taken by the Bob Knight rink from Irricana with seven wins and one loss. Prize winners were:

BEISEKER MOTORS EVENT

1. Eldon Wray, Ben Helwig, G. Allsop, D. Allsop, Irricana.
2. Sid Jonckhan, S. Dryden, K. Lusk, Herman Corry, Calgary.
3. L. L. Schmaltz, Gus Martin, Bob Schissel, Jim Martin, Be s.
4. Harold Knight, Bill Knight, R. Korschuk, N. Korschuk, Irricana.

ADAMS SHOP EVENT

1. Bob Knight, Tom Howden, Ed Steel, John Howden, Irricana
2. Adam Velker, Gordon Reddekopp, L. Giles, G. N. Schmaltz Beiseker.
3. Stan Olsen, Louis Hagel, A. Rutherford, Aloys Hagel, Beis.
4. Wendel Schmaltz, Alan Berreth, Sam Kruger, Gottlieb Berreth, Beiseker.

HARD LUCK EVENT

1. Herman Kroschel, Earl Balderson, Chuck Balderson, Geo. Northcott, Beiseker.
2. Roy Berreth, Leo Haase, Jas. Rau, Wm. Berreth, Beiseker.
3. Stan Olsen, Louis Hagel, A. Rutherford, Aloys Hagel, Beis.
4. C. Anderson, W. Anderson, H. Anderson, H. Longson, Kathryn.

CITIZENS EVENT

1. Ted Tonger, H. J. Follenbee, W. Brady, B. Newby, Calgary.
2. G. Thomson, D. Miller, F. Patton, B. Pompain, Calgary.
3. A. Troidl, F. G. Schmaltz, Marcus Hagel, Joe Ternes, Beis.
4. Eldon Wray, Ben Helwig, G. Allsop, D. Allsop, Irricana.

First rink out of the 'Spiel was the Dave Lang, Harvey

Hempel, Don Haase, Jim Ohlhauser.

The prizes were outstanding this year and received much praise.

Many very favorable comments were expressed by out of town curlers for the splendid arrangement of draws by our genial drawmaster L. L. Schyn.

WHILE THE DEPARTMENT of Economic Affairs might have the responsibility of operation of the auditoriums, the Department of Public Works had the task of designing and constructing them. In addition, the staff of the department had the task of making sure the structures did what they were intended. Experts spent many a weary hour in the freezing darkness of a winter's night testing the acoustics as building progressed. Daytime noises would have spoiled test opportunities.

IF THE SCARE headlines are worrying you these days, there might be comfort in formation of a Civil Defence and Disaster organization in your community. Under the terms of The Civil Defence Act, the municipality effecting the organization will be reimbursed by grant for two thirds of the cost of the approved projects. Under agreement with the federal authorities, the province in turn is reimbursed for half its expenditure. Thus, the federal, provincial and municipal governments each share equally the cost of a civil defence project.

WITH THE END of the school term in sight for many students in the province, there is some consideration being given by many as to the vocation they will follow on graduation. One of the more popular professions for girls is that of nursing. In some instances, the matter of finances interfere with the hopes of the young lady who would wear a cap. To take care of this problem, a number of scholarships have been set up which may be applied for by qualifying applicants. And in addition, there is a loan fund which may be used to help the student nurse through her training. Application to the Department of Education will bring details promptly.

Be seeing you soon—

WHILE THE DEPARTMENT of Economic Affairs might have the responsibility of operation of the auditoriums, the Department of Public Works had the task of designing and constructing them. In addition, the staff of the department had the task of making sure the structures did what they were intended. Experts spent many a weary hour in the freezing darkness of a winter's night testing the acoustics as building progressed. Daytime noises would have spoiled test opportunities.

IF THE SCARE headlines are worrying you these days, there might be comfort in formation of a Civil Defence and Disaster organization in your community. Under the terms of The Civil Defence Act, the municipality effecting the organization will be reimbursed by grant for two thirds of the cost of the approved projects. Under agreement with the federal authorities, the province in turn is reimbursed for half its expenditure. Thus, the federal, provincial and municipal governments each share equally the cost of a civil defence project.

WITH THE END of the school term in sight for many students in the province, there is some consideration being given by many as to the vocation they will follow on graduation. One of the more popular professions for girls is that of nursing. In some instances, the matter of finances interfere with the hopes of the young lady who would wear a cap. To take care of this problem, a number of scholarships have been set up which may be applied for by qualifying applicants. And in addition, there is a loan fund which may be used to help the student nurse through her training. Application to the Department of Education will bring details promptly.

Be seeing you soon—

Your Future is Here... In Alberta

THIS ADVERTISMENT IS NO. 141 OF A SERIES PREPARED BY THE DEPARTMENT OF ECONOMIC AFFAIRS.

GOVERNMENT of the PROVINCE of ALBERTA
